effective handling...

GLUE DOTS™ are pressure sensitive dots of adhesive that can be applied almost anywhere, making them a smart solution for print, packaging and assembly applications. They keep items aligned and secured by forming a strong instant bond to nearly any surface in any environment.

The Right GLUE DOTS™ for the job

Available in three adhesive tack levels and three profiles. There is a standard GLUE DOT™ for almost any application.

Adhesive Strengths			LOW PROFILE 0.5mm THICK
Very Low Strength	High Strength	Very High Strength	
Low Tack	High Tack	Super High Tack	MEDIUM PROFILE 1.0mm THICK
			HIGH PROFILE 2.0mm THICK

In most cases, Super High Tack creates a permanent bond, while Low or High Tacks are considered removable.

## Printing, Binding Mail & Fulfilment

## Packaging & Material Handling

## Manufacturing & Assembly
